PEERS students presenting their research at Research Poster Day.

UCLA Undergraduate Research Center - Sciences

The Undergraduate Research Center – Sciences offers programs to aid students in achieving academic and research success.

Programs to get you started in Research

Student Research Program (SRP)

Earn research credit by enrolling in SRP (Honors 99) during the academic year or summer.

Biomedical Sciences Enrichment Program (BISEP)

A 6-week summer program for freshmen. Students receive lab training and scientific writing workshops and give an oral presentation on a human genetic disease.

CARE Fellows and Scholars

Provides financial support (\$875-\$1,500 per quarter) for working 10-12 hours per week in a research lab. Applications are available every quarter.

Undergraduate Research Fellows Program

Apply in the fall for a \$2,000 award to do research in the winter and spring quarters

PEERS students participating in the Biomedical Sciences Enrichment Program in summer 2014.

Frequently Asked Questions During Your First Quarter in PEERS

Q: How do I go about choosing a major?

A: Talk to your PEERS Academic Counselor. S/he can help you navigate the many science majors. You should also visit the department counselor in the major you are considering.

Q: I know my major, but what classes do I need to take?

A: Your PEERS Counselor is familiar with all the requirements for the science majors. You can also visit the counselor in your respective department. S/he can help you plan your 4 years at UCLA.

Q: Who can I talk to if I'm having trouble managing my classes, PEERS responsibilities and life in general?

A: The PEERS Counselor is here for you! S/he will direct you to resources to help you with balance and study habits.

Q: Who can tell me more about research opportunities?

A: Visit the Undergraduate Research Center-Sciences office in 2121 Life Sciences Building or email Dr. Tama Hasson. We will make sure you find the right faculty mentor and research program for you!

From the Director

Dear First Year Students,

Welcome to UCLA and welcome to PEERS! By joining PEERS you have taken a critical step towards a successful career as a UCLA Science major. Your undergraduate years are exciting and dynamic, and the entire PEERS staff is here to assist and guide you so that you fulfill your potential and achieve your personal goals.

At PEERS, we focus on maximizing your success in the sciences by:

- Maximizing academic performance;
- Promoting deep understanding and learning;
- Encouraging active participation in the UCLA scientific community;
- Providing exposure to a broad range of exciting, cutting edge research;
- Facilitating engagement in undergraduate research.

By participating in PEERS and taking advantage of the opportunity it represents, PEERS students are exceptionally successful as science majors. Specifically, PEERS students:

- Earn higher grades in their core Math, Physics and Chemistry courses;
- Maintain higher overall grade point averages;
- Engage more in undergraduate research;
- Graduate faster.

We look forward to meeting you in the fall and working with you over the next two years. Welcome aboard and best wishes for an exciting and productive freshman year.

Dr. Paul Barber
PEERS Faculty Director

The Components of PEERS – YEAR 1

Summer 2018

- Complete Math Diagnostic Test
- Attend summer orientation and meet with the PEERS Program Representative
- Enroll in courses, including
 - Math and Chemistry or Life Science
 - PEERS collaborative learning workshops
 - PEERS Freshman Seminar

Fall 2018

- Attend PEERS Welcome Reception (Wednesday of Zero Week)
- Take the Chemistry Diagnostic Exam
- Take your courses including:
 - Math and Chemistry or Life Science
 - PEERS collaborative learning workshops
 - PEERS Freshman Seminar
- Attend PEERS research talk and poster session

Winter 2019

- Take your courses including:
 - Math and Chemistry or Life Science
 - PEERS collaborative learning workshops
- Attend PEERS research talks and info sessions

Spring 2019

- Take your courses including:
 - Math and Chemistry or Life Science
 - PEERS collaborative learning workshops
- Attend Research Poster Day and PEERS research talks
- Attend PEERS End of Year Reception

In addition, each quarter you will meet with your PEERS counselor for personalized academic guidance and complete course/program evaluations so we can make PEERS serve you better.

Benefits of PEERS

Counseling

PEERS provides unique access to academic advising that is personalized and tailored to your individual goals. Your PEERS Counselor makes sure that you take the right courses, and make good decisions about how to study and excel in your science major. Our specialized academic advising helps PEERS students graduate faster and with a higher GPA than other UCLA science majors.

Research Events

PEERS gives incoming science majors unparalleled access and insight into the UCLA research community. Each quarter PEERS students attend exclusive research talks by leading UCLA scientists. We also host poster sessions by students to expose you to the exciting possibilities in undergraduate research. These events allow you to meet UCLA faculty and PEERS alumni, hear about their research and learn how to become involved in undergraduate research. These events are only for PEERS students, ensuring that you have the best opportunities to join research labs on campus.

Career and Research Exploration

The PEERS sophomore seminar (EE BIOL 97XB) exposes students to careers in science and prepares you to join a research lab. This seminar hosts various career panels, focusing on fields and industries that you find interesting. In addition, we host student panels focused on graduate and professional schools so that you learn about career opportunities available with a science degree and how to attain them. We also cover how to identify and successfully apply for research opportunities and UCLA programs that will fund you to do research.

Taking Classes with PEERS students

The PEERS staff will guide you as you enroll in your math and science classes during your first year at UCLA. We facilitate enrollment in the same lectures and collaborative learning workshops as other PEERS students, ensuring that you have a supportive group of students to study with and that you have a strong feeling of community while at UCLA.

Benefits of PEERS

Higher Grades in Your Science Classes

Collaborative learnings workshops are an integral part PEERS success. In each workshop, advanced graduate students serve as facilitators to guide you through the learning process in your core math, chemistry, life sciences, and physics courses. Facilitators design worksheets to deepen your understanding of course materials and develop your problem solving skills.

These PEERS workshops are low stress, supportive learning environments. Workshops meet twice per week, building in effective, structured study time for your science classes. As a result, PEERS students routinely get one grade higher than other students in the class, resulting in higher GPAs.

Faster Time to Graduation

Because the collaborative learning workshops result in higher grades, PEERS students rarely retake courses. This academic success combined with personalized academic counseling ensures you graduate on time, saving you time and money. PEERS students have the fastest time to graduation at UCLA!

Better Study and Time Management Skills

The PEERS Freshman seminar (EE BIOL 97XA) is designed to help you transition to the UCLA academic environment. This one-unit pass/no pass course meets weekly to develop your time management, study skills, and test taking strategies, and it helps you navigate your first quarter at UCLA. Students in this seminar report that skills learned in this seminar helped them succeed in their first quarter science classes as well as other science and non-science courses.

Enrollment in the Academic Advancement Program (AAP)

Through AAP, PEERS students have access to specialized academic advising, peer learning (tutoring) and other resources to promote academic excellence. To activate AAP membership, you must attend an AAP Orientation Workshop during your first quarter. Please visit aap.ucla.edu for details.

The Components of PEERS – YEAR 2

Summer 2019

- Consider participating in a summer research program like the Biomedical Sciences Enrichment Program (BISEP) or a program for pre-medical or pre-dental students.

Fall 2019

- Attend PEERS Welcome Reception
- Take your courses including:
 - Math/Science courses
 - PEERS collaborative learning workshops
 - PEERS Sophomore Seminar
- Meet with your departmental counselor
- Attend PEERS research talk and poster session

Winter 2020

- Take your courses including:
 - Math/Science courses
 - PEERS collaborative learning workshops
- Attend PEERS research talks and info sessions
- Apply for a two-year research program through the Undergraduate Research Center

Spring 2020

- Take your courses including:
 - Math/Science courses
 - PEERS collaborative learning workshops
- Attend Research Poster Day and PEERS research talks
- Attend End of Year Reception and graduate from PEERS!

In addition, you will meet at least once per quarter with your PEERS counselor for personalized academic guidance and complete course/program evaluations.

Course Sequence

Scheduling for science majors can be confusing, so we've simplified the course sequence for your first two years at UCLA to make it easier for you. Each quarter you typically take core courses in math, life science (only life science majors), chemistry, and/or physics. With each of these courses, we offer exclusive collaborative learning workshops to help you excel and earn higher grades (for more information see page 8).

Typically, you enroll in two workshops per quarter (one for each of your core courses). Yellow indicates your course sequence if you start with Math1 or Math 31AL.

First Year Students

	Life Science			Physical Science	
	Math	LS	Chem	Math	Chem
Fall	1	7A	---	31AL	---
	LS30A			31A	20A
Winter	LS30A	---	14A	31B	20A
	LS30B				20B
Spring	LS30B	---	14B	32A	20B
	---				30A

Second Year Students

	Life Science			Physical Science		
	LS / Stats	Chem	Physics	Math	Chem	Physics
Fall	LS7B	14C	5A*		30A	1A
	LS7C					
Winter	LS7C		5B			1B
	Stats 13					
Spring	Stats 13		5C			1C

*Students in Life Sciences majors who are not on the pre-med track are encouraged to start the Physics series in Winter of their second year

What does it mean to be in PEERS?

PEERS is a program for outstanding students who are committed to academic excellence and want to pursue careers in the life or physical sciences. PEERS works with you to develop a strong foundation in the sciences so you are ideally positioned to achieve your educational and career goals. PEERS will expand your horizons considerably during your first two years at UCLA, helping you explore and navigate the diversity of science career options.

For students committed to success, PEERS is very rewarding: improved grades; faster time to graduation; a diverse, supportive learning community; an understanding of the scope of science and scientific research; access to opportunities to participate in research yourself; and friendships that will last a lifetime.

Research Opportunities

PEERS students are encouraged to engage in undergraduate research. The PEERS staff assists students in identifying appropriate faculty mentors and obtaining financial support for research during the academic year and summer. PEERS students are very successful. Following PEERS, many alumni participate in prestigious undergraduate research programs, such as Maximizing Access to Research Careers, UC LEADS, and MSD Scholars. PEERS alumni are now in top graduate and professional schools across the country!
